AUSTRALIA THROUGH BIRDWATCHERS' EYES

Where Australians record birds, which species appear, and how communities build knowledge together.

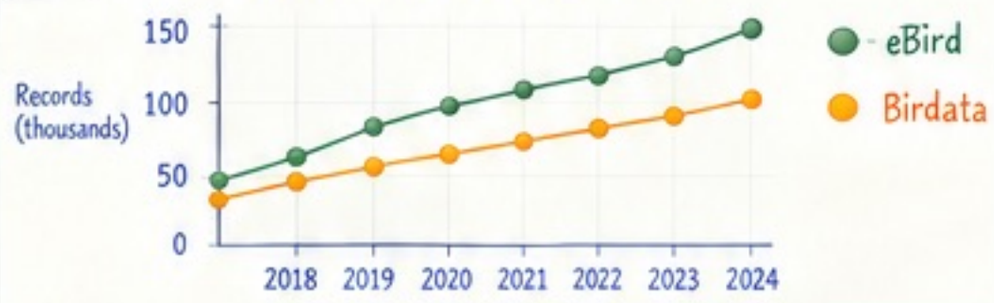

PLANNING SKETCH — FINAL VALUES TO USE VERIFIED DATA

1 WHERE DO CITIZEN SCIENTISTS RECORD BIRDS?

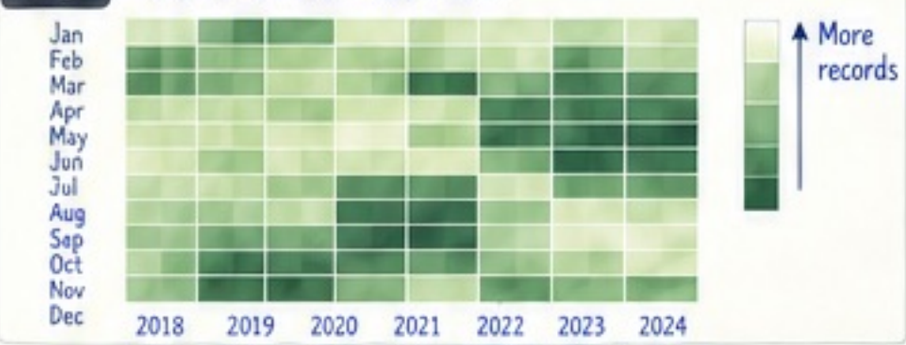

C1 Records by state, 2024

C2 Records over time, 2018 – 2024

C3 Observation calendar

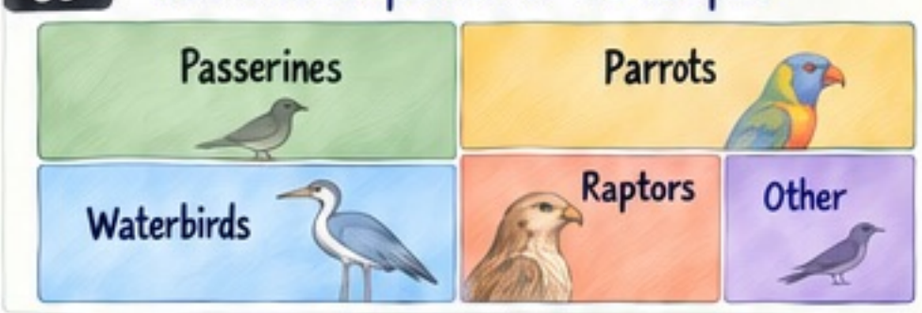

2 WHICH BIRDS APPEAR IN THE RECORDS?

C4 Selected bird sample locations

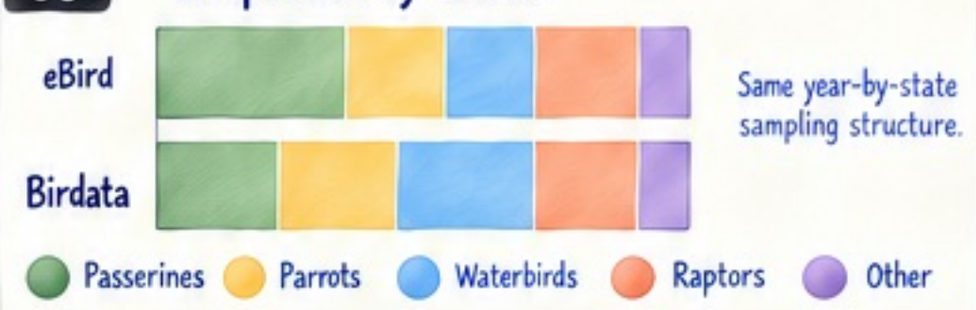

C5 Taxonomic composition of the samples

C6 Composition by source

3 HOW DOES OBSERVATION ACTIVITY CHANGE?

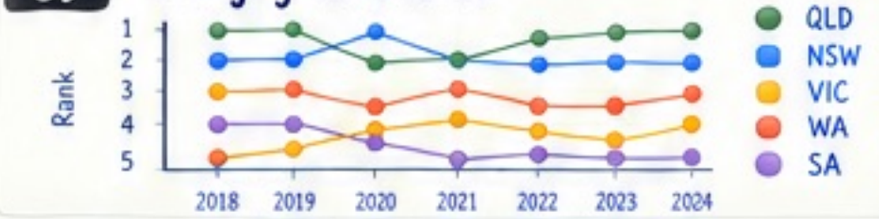

C7 Birdata share by state, 2024

C8 Monthly share of records

C9 Changing state ranks

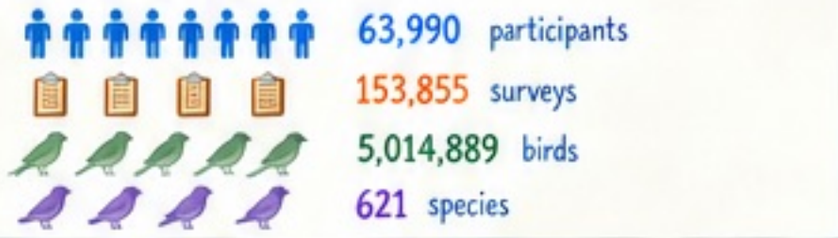

4 THE PEOPLE BEHIND THE RECORDS

C10 Aussie Bird Count participation, 2023 – 2025

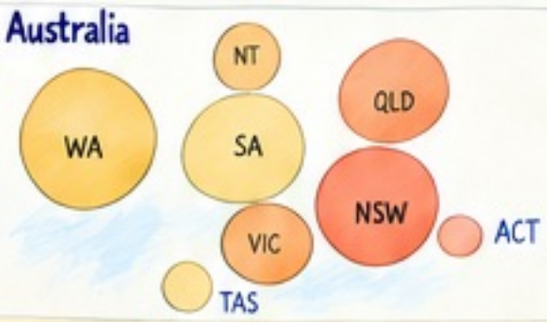

C11 2025 Aussie Bird Count

C12 Reporting activity reshapes Australia

Geographic areas are replaced by circles; neighbourhoods are approximate.

WHAT THE RECORDS CAN TELL US

Map reporting coverage

Compare species and seasons

Show how communities contribute

More records do not necessarily mean more birds.
